

## HOW THIS NEW SYSTEM WILL HELP US SERVE YOU BETTER:

1

The new farebox counts the inserted fares—making for faster passenger boarding and less waiting.

2

The farebox counts various types of passengers to provide operational information for improving our service.

3

The farebox accepts all U.S. coins and dollar bills for the payment of your fares.

4

The farebox employs improved security to protect the collected revenues.

## HOW YOU CAN HELP US TO SERVE YOU BETTER:

Have your fares ready to insert into the farebox when you board the bus.

Insert **only coins** into the coin slot. Never insert paper or tickets in the coin slot.

If you are paying with a dollar bill, open it full length and insert it into the bill slot—either side up.

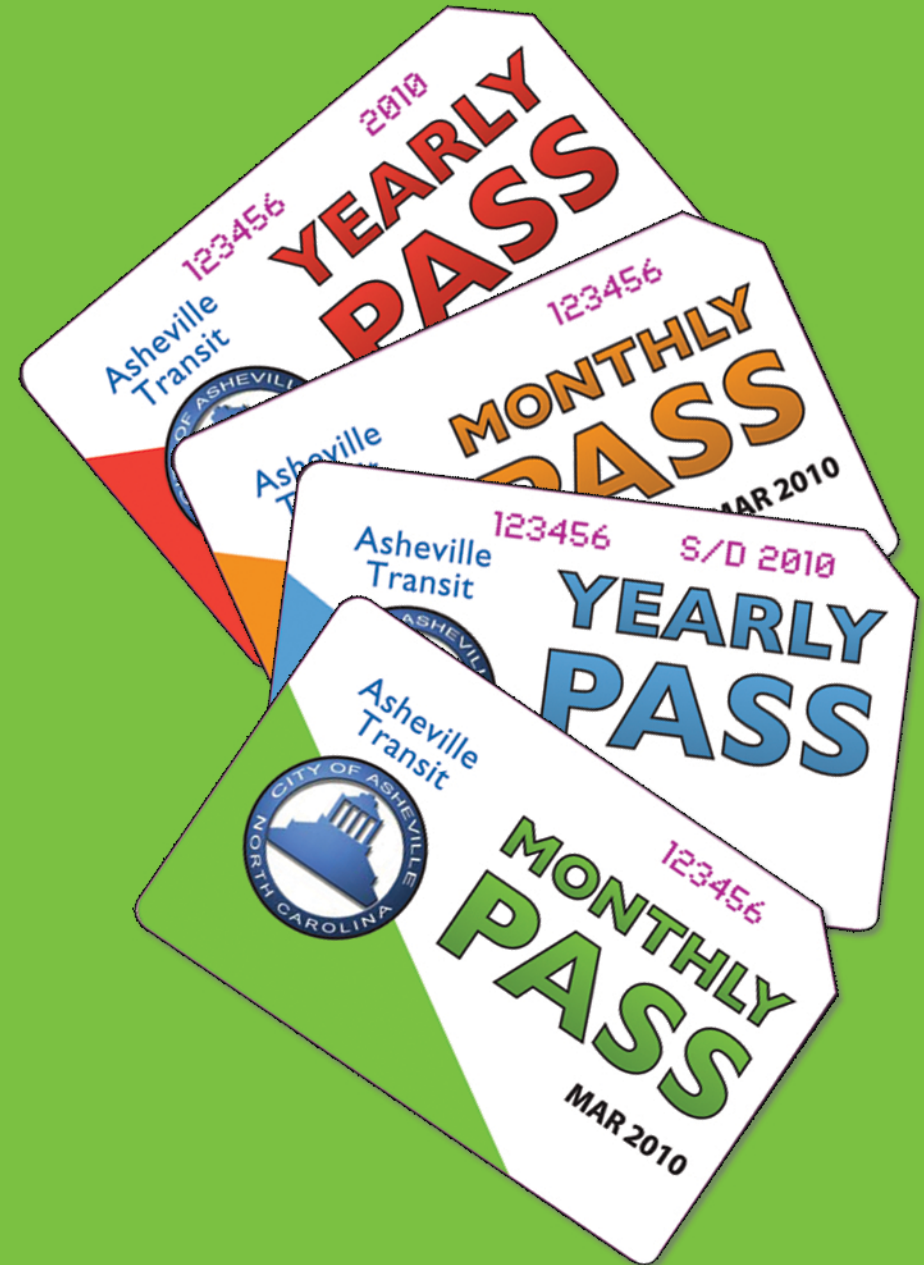

Listen for the “beep” sound after you pay your fare or show the driver your pass. The farebox will sound a “beep” which tells you and the driver that the correct fare has been paid.

Please insert all fares into the farebox. Drivers are not permitted to accept your fares.

## Introducing New Registering Farebox! Coming January 24, 2009

## Asheville Transit is pleased to announce the new Electronic Farebox.

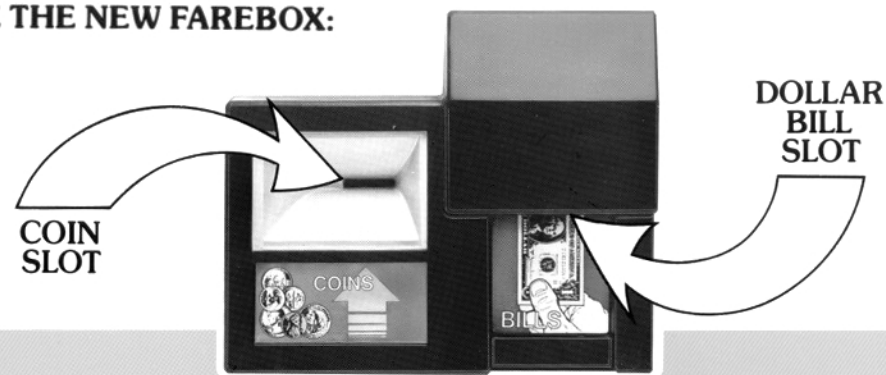

The new design makes it easy for passengers to deposit fares for rapid fare collection and verification.

The farebox has a separate coin and bill slot along with a card reader for swiping passes.

New “swipe and ride” monthly and yearly passes will be available in mid-February for use beginning in March.

For now, show your current monthly/annual pass to the driver until the new passes arrive. If you have a current yearly pass, please bring it to the Transit Center when the new passes arrive and you will be issued a new pass.

### HOW TO USE THE NEW FAREBOX:

#### COINS –
